(54) Title: PROVISION OF INFORMATION REGARDING A MOBILE STATION

(57) Abstract: A method of providing information regarding a mobile station adapted for communication via a communication system is provided. In the method an area event notification request is received at a location service entity provided in association with the communication system, the area event notification request containing information associated with the identity of the mobile station and an area of interest. Monitoring for an event indicative of a change in the presence status of the mobile station relative to said area of interest is then activated. A notification is signalled in response to detection of such event.
